Media theory and the philosophy of technology — research grounded in artistic practice

ziyi.li.research@gmail.com · +49 1522 3288704 · Bremen, Germany · pflaumenkleidunggg.github.io/ziyi-li

RESEARCH PROFILE

I work at the intersection of digital media, media theory, and the philosophy of technology, examining the relationship between **materiality and cognition** — how material and technical systems at once reveal and conceal the limits of human understanding, and how new forms of knowledge and perception emerge from that tension. Across a sustained body of practice-based research centered on the **human voice**, I treat phonation as a critical site for rethinking embodied cognition, human-machine relations, and the material conditions that artificial intelligence presupposes and erases. My method joins the hands-on construction of vocal apparatuses with theoretical inquiry drawing on cybernetics, new materialism, embodied cognition, and the philosophy of mind. I pursue this work primarily through scholarly writing, conference presentation, and publication, with making serving as a mode of material investigation rather than an end in itself.

Keywords: media theory of art and technology · philosophy of technology · embodied & extended cognition · cultural techniques · human-machine relations · critical AI · new materialism · sound and voice studies

EDUCATION

Master of Arts, Digital Media — Hochschule für Künste Bremen, Germany 10/2023 – 02/2026
Thesis: *Vocal Organ: Apparatus for Generating Voice and Images* (60 pp.). Advisors: Prof. Dr. Andrea Sick, Prof. Ralf Baecker, Prof. Natascha Sadr Haghighian.

Vordiplom (Intermediate Diploma), Freie Kunst (Fine Art) — Hochschule für Künste Bremen, Germany 10/2020 – 07/2023
Sculpture, ceramics, and installation exploring the vocal apparatus and the simulation of the human voice.

Bachelor of Arts, Painting — Luxun Academy of Fine Arts, Shenyang, China 09/2015 – 06/2019

German Language Studies — Fremdspracheforum Sprachschule, Köln, Germany 08/2019 – 03/2020

PUBLICATIONS & WRITING

Li, Ziyi (2026). *Vocal Organ: Apparatus for Generating Voice and Images*. MA thesis, Hochschule für Künste Bremen. Open-access preprint, DOI: [10.31235/osf.io/ywdct_v1](https://doi.org/10.31235/osf.io/ywdct_v1).

An interdisciplinary study of how the material act of phonation relates to the emergence of intelligence. Traces the progressive stripping of the voice's material conditions through writing, phonography, and AI-generated speech, and proposes “**The Room without Echo**” as a material-acoustic critique of Searle's Chinese Room. Engages Wiener (cybernetics), Merleau-Ponty and Clark & Chalmers (embodied/extended cognition), and Searle and Putnam (philosophy of mind).

PRACTICE-BASED RESEARCH

Vocal Tectonics — Physical installation, Bremen 2025
A constructed vocal apparatus (porcelain, silicone, air pumps, Raspberry Pi) that materializes the invisible cavity of the human vocal tract. Treating the voice as a “converter” between concept and matter, the work stages cognition as something investigated through hands-on engagement with physical systems, drawing on the notion of the material-discursive apparatus.

Initial Voice — Material research project 2024
Advisor: Prof. Ralf Baecker. Reconstructs the body's resonant cavities in porcelain and silicone to study vocalization as a material process, connecting a personal history of hearing impairment to broader questions of perception, sensory reorganization, and embodied knowledge.

Humanoid Vocal Simulator — Vordiplom project 2022
Advisor: Prof. Dr. Mona Schieren. A first mechanical device simulating human vocalization, probing the gap between externally understanding vocal mechanics and the internal experience of producing voice — and the limits of technical replication.

EXHIBITIONS

SOLO

<i>Vocal Organ</i> — Hochschule für Künste Bremen, Germany	2026
<i>Humanoid Vocal Simulator</i> — Hochschule für Künste Bremen, Germany	2022

GROUP

<i>I Hope This Finds You Well</i> — Hochschule für Künste Bremen, Germany	2025
<i>Studies of Change</i> — Alte Pathologie, Bremen, Germany	2024
<i>Our Porous Limits</i> — SPEDITION Kunst- & Kulturverein, Bremen, Germany	2021
<i>OUT/SYNC</i> — Galerie HBKSAAR, Saarbrücken, Germany	2021

PROJECT / COLLABORATIVE

<i>Habla con la papa en la boca</i> — After the Butcher, Berlin, Germany	2025
<i>goarwywaswyt</i> — Hochschuletage, HfK Bremen, Germany	2025
<i>LACUNA: Inside of a Dumpling</i> — Hochschuletage, HfK Bremen, Germany	2022
<i>Walking Towards a Garden</i> — Hochschuletage, HfK Bremen, Germany	2022
<i>When to Move in Disorientation</i> — Open Space Domshof, Bremen, Germany	2021
<i>Shape Shifting – Sightings</i> — Circa106, Bremen, Germany	2020

HONORS & AWARDS

DAAD Prize for Outstanding Achievements by International Students — DAAD & Hochschule für Künste Bremen	2025
--	------

PROFESSIONAL & CURATORIAL EXPERIENCE

Curatorial & Workshop Assistant — chi K11 art space, Shenyang, China	05/2018 – 08/2019
---	-------------------

SKILLS

Physical computing & creative coding: Arduino, TouchDesigner, Processing, Python
3D & fabrication: Blender; ceramic/porcelain casting, silicone molding, installation construction, physical prototyping
Printmaking & studio: silkscreen, copperplate, lithography, sculpture (clay, plaster), painting
Media & web: audio/video editing, Adobe Illustrator & Photoshop, HTML5 & CSS
Languages: Mandarin Chinese (native), English (fluent), German (B2)
